Wine & Drawing Tickets will also be available for purchase during the event

### About the Movies

"A Night in the Deep" will feature two BBC produced films along with two (very) shorts. "The Great Feast" is a stunning documentary about the summer plankton bloom off the coast of British Columbia and Alaska, and the animals that depend on it for their survival. "Creatures of the Deep" is a look into the lives of the most mystifying and abundant animals in the oceans: invertebrates. The two shorts "Attack of the Sea slugs" and "The Secret Weapon" both provide a brief, brilliant look into the lives of two interesting creatures.

### About The Sanctuary Exploration Center

The beneficiary of the event, the Sanctuary Exploration Center, is a project of the Monterey Bay National Marine Sanctuary, and will support state-of-the-art, interactive interpretive exhibits and is expected to attract 200,000 visitors per year. These innovative exhibits will allow visitors a unique look into the issues impacting the marine ecosystem, and will encourage each person to examine the personal role they have in the protection of our nation's underwater treasures in places such as the Monterey Bay National Marine Sanctuary.
